

Pre-Operative Laser Treatment Instructions

1. Please notify us on any history of diabetes, herpes, blood coagulation disorders, keloid or hypertrophic scarring.
2. For one month prior to treatment, avoid sun exposure as well as tanning beds and tanning creams. Use sunscreen designed to protect against UVA and UVB rays with 30+SPF at all times and reapply as directed by the manufacturer.
3. Discontinue the use of Retina-A or any retinal-type products at least 1 week prior to your treatment.
4. Discontinue the use of all exfoliating products and glycolic and alpha-hydroxy acid products, 1 week prior to your treatment.
5. Wait at least two weeks after Botox injections before having your treatment
6. Please bring a hat, sunglasses, and umbrella if desired.
